Kyanit Parke, which follows closely the advancements in the sector and new demands in the market, has justified pride of being one of the pioneer companies of its sector with its strong capital structure and corporate identity and being the biggest producers of Northern Cyprus with its approximately 450.000 m2 production capacity.

Our factory which provides building materials to the construction sector was planted in 14.000 m2 open, 2.300 m2 closed area has two production lines and our mass production machines realizes production and packaging with interconnected automation system.

In our factory not only 13 types of floor covering materials such as interlocking, octagon, hexagon, turf concrete tiles, etc. but also building construction materials with 4 types of concrete kerbs, 3 types of concrete block groups, 3 types of infrastructure groups and 6 types of pumice block groups are being produced.

VISSION

Being the leader brand in its sector by creating difference with its product and services and by embracing sustainable development with its innovative staff.

MISSION

Being a reputable, environment-friendly, customer-oriented and employee-cherisher establishment.

OUR QUALITY, ENVIRONMENT AND OHS POLICY

From the day it was founded, our policy is increasing customer satisfaction by offering high quality products and services, protecting environment, ensuring occupational health safety and the highest work ethics principles and continuous improvement.

Since the arrangement of the tests are made according to the quality plan in Kyanit Parke, 27 tests are applied from the start of the raw material tests to the final product. They are made as required by TS EN 12350-6, TS EN 12390-7, TS EN 12390-3/2003, TS EN 772-1, TS EN 772-6, TS 2824 EN 1338, TS 436 EN 1340 standards of the Turkish Standards Institute.

Some of these tests are as follows:

- ✓ Fresh Products Intensity Test is made for the control of unit volume mass each day for pressure and bending strength in the given frequency.
- ✓ Fresh Product Cement Content Test is made for the control of the cement content, the determination of water-cement ratio and data gathering each day.
- ✓ Cast Concrete Sample Pressure Resistance Test is made by taking 6 samples for each 100 cubic meter from each concrete class in daily production.
- ✓ Concrete Tile Stone Strength Test is made once in production for each product type for tensile strength situation in engraving.
- ✓ Concrete Tile Stone Work Size Control Test is made once in production for each product type for the determination of actual sizes.
